

## Using the query drill mode

### Procedure

1. Start the transaction using the menu path or transaction code.

### Internal

2. Click the **Document** menu.

When viewing a document in InfoView, you can set the query drill option in the Document Properties dialog box.

3. Click **Properties**.

## Using the query drill mode

---

4. Click the **Use query drill** option.
5. Click **OK**.
6. Press **[Enter]** to continue.

If the report already has a scope of analysis defined, you will see a message telling you that you must clear the scope of analysis before can activate the query drill.

**Note:** You need the necessary access rights from your administrator to clear the scope of analysis.

Press **[Enter]** to continue.
